

PMC & Construction Supervision

CORPORATE PROFILE

The Phoenix Associates Group is Consulting Engineering Firm specialized in transportation and urban infrastructure. For over 10 years, the firm has been providing consulting and advisory services on infrastructure projects to a wide range of clients in the public and private sectors across the nation. Phoenix Associates is one of the leading Nigerian Consultancy Firms in the area of infrastructure, development and management. In a period of 10 years, Phoenix Associates has gained recognition for integrating state-of-the-art technology with project development in the infrastructure sector. Phoenix Associates looks after business in Lagos, Abuja and Port-Harcourt. Phoenix Associates is also active in Edo state and the Northern parts of Nigeria.

Phoenix Associates' credentials combined with multifaceted skills translate into provision of services covering whole spectrum of highway design, structural engineering and management. Our understanding of highway engineering is unparalleled encapsulating all dimensions from planning to design and construction. We employ a multidisciplinary approach to projects, providing comprehensive highway engineering, material & pavement engineering and geotechnical engineering solutions. We are driven by a commitment to excellence and providing the best of services to our clientele.

PMC & Construction Supervision

The Phoenix Associates has over the years acquired expert knowledge in Project Management Consultancy and Construction Supervision.

Phoenix Associates has been able to combine the transfer of technology from the development world with an appreciation and understanding of simple technologies that are often necessary and appropriate for local conditions. Phoenix Associates has developed a Quality Assurance (QA) Management System for the supervision of Works and Supervision activities. Our in-house experts have extensive experience in both the implementation of Quality Assurance/Management Systems and the training of counterpart staff to manage such systems.
